Ghassane BINAHLA

Software & Backend Engineer specializing in Artificial Intelligence

Available for Freelance assignments or Permanent position

Software & cybersecurity engineer, specialized in Backend and in designing software and AI products.
Experienced Python Backend Developer, passionate about IT and cybersecurity, solution/product-oriented.
Founding Engineer on AI product MVPs 0 → 1, from R&D to PRD, with an approach inspired by Systems Engineering.

Education

Nexa IA School — Master's Degree
Data & AI Project Manager
2024 – 2025
Thesis: Generative AI in companies
Case study: Applications in Cinema

- Data Science/Engineering: NLP, CV, ML/DL, SAS, Visualization, MLOps
- Serious Game – #1 / 78 teams (France)
- Datathon – Physiotherapist AI assistant

ENSIBS — Engineering Degree
Comp.Sci.&Cybersecurity SecNumEdu
2019 – 2023

- SDLC, DevSecOps, Systems Engineering, Secure-by-Design development, IS
- Software hardening, Risk analysis, Code & config. audit, Penetration testing
- Kubernetes, Cloud, Net.&Sys. admin.
- Member of the Hack2G2 association

ENSIBS — Preparatory Program
Engineering Schools Track
2017 – 2019

- Programming, Algorithms, Pentest, Databases, Networking, OS, IoT
- Engineering sciences, Robotics, CAD
- Member of the Hack2G2 association

Lycée René Descartes — High School
Scientific Baccalaureate, IT specialization
2010 – 2017

- Python training for new IT teachers

Languages

- English : Bilingual / Professional – C1
- French : Native / Professional – C1
- Arabic : Native / Professional – C1
- Spanish : Beginner – A2

Certifications

- *TOEIC* – C1 (970/990)
- *Voltaire Certificate* – Business level
- *Junior Penetration Tester* – THM
- *Challenges & stakes of cybersecurity*
- *Management through Care* – CNAM

Professional Experience

PyratzLabs — Backend Developer & AI Staff Engineer *Paris, Hybrid*
Jan 2025 – Sep 2025 Fixed-term contract
End-to-end design and development of AI products; consulting for Startup Studio

- AI monitoring, feasibility studies for ideas, and R&D
- Workshops, demos, gathering needs and methods with professionals
- MVP delivery, architecture design and roadmap definition
- Development and production deployment of multimodal pipelines
- Implementation and orchestration of deterministic, model-agnostic systems
- Observability: structured logs, AI calls and tools, dashboards
- CI/CD: QA, automated tests, GitLab, Docker, audit, deployment
- ↓ **Founding Engineer**: direct collaboration with founders (product&vision)

Stealth Startup — MVP & Architecture *Paris, Remote*
Jan 2025 – Sep 2025 Founding Engineer
Granular, one-shot AI cinema studio – Sole staff/engineer until production

- Long-form AI video studio (>10 min) with model-agnostic architecture
- Creation of film scripts, storyboards, intent and entity extraction
- Model orchestration and standardization/mapping of inputs/outputs
- Cost optimization (multi-threading, fine-tuning, LoRA, caching, batching)
- Output scoring, entity consistency (locations, characters, objects, styles, voices)

Stack: Python (Django, PydanticAI, PyTorch), API REST, LangChain, Event-Driven Architecture (Redis), Prompt Management Systems, ComfyUI, Hugging Face, Token Usage Optimization, CI/CD (Docker, Gitlab, GCP)

Stealth Startup — MVP & Tech Lead *Paris, Remote*
Jan 2025 – Aug 2025 Founding Engineer
AI concierge agent (APIs, text and voice) – Sole staff engineer – MVP

- Memory, decision-making, execution, RAG, text-to-speech, ASR
- Multiple authenticated user/provider interfaces (Email, SMS, Phone call)
- Service recommendation system for users

Stack: Python (Django, PydanticAI, FastAPI), Vector Databases (Pinecone), Hybrid Search, VAPI/Twilio, Scraping, CI/CD (Docker, Gitlab, GCP)

BNP Paribas CIB — Automation Developer *Paris, Hybrid*
Sep 2022 – Sep 2023 Fixed-term contract
Reporting automation for the EMEA Backup team; preparation for DORA audits

- Built an internal monitoring and reporting platform for 150+ backup servers/appliances (automation saving 1 person-day/week)
- Integrated security policy checklists to prepare for DORA audits
- L3 support and development of no-code tools for RUN operators

Stack: Python (Django, FastAPI), OpenAPI Spec 2.0, ApiGee, Cron, IaC, Ansible, Automation, Scripting, S3, Git, Prometheus, Grafana, ElasticSearch

UM6P — Assistant IT Engineer – Network & Security *Rabat, On-site*
Jul 2022 – Aug 2022 Internship
SIEM solutions study, deployment and integration into the IS

- Identification and analysis of cyber risks in research and education
- Deployment and integration of a SIEM solution into the information system

Stack: Security product architecture, Firewall, Network, HIDS/NIDS, SIEM, Logging, Forensics, ElasticSearch, Containerization, Threat Intelligence

Personal Projects

PhysioAI — AI Assistant for Physiotherapists *MVP*

- Pain prediction (location + intensity) using XGBoost, Streamlit WebApp
- Accuracy: 94% within ±1 cm / 99% within ±5 cm (1k rows, proprietary data)
- Exercise, massaging and motion suggestions integrated after prediction

Patient-centric Healthcare CRM — Care centralization *Prototype*

- Centralized patient record + prescription management (Django/React, Docker)
- Integration of official reference datasets: pathologies, treatments, indications
